

The [Oxford Protein Informatics Group](#) is currently recruiting for a Postdoctoral Researcher in collaboration with Boehringer Ingelheim.

Postdoctoral Researcher
Statistics, 24-29 St Giles', Oxford, OX1 3LB
Grade 8: £41,526- £49,553 p.a.

There is an exciting new opportunity in the Oxford Protein Informatics group for a postdoctoral researcher to work in collaboration with Boehringer Ingelheim. We are recruiting to the vacancy now, for someone to start as soon as possible. You will carry out research in the area of immunoinformatics, in a dynamic and collaborative group and department, where our research is world-leading.

We need you to hold a relevant PhD/DPhil and to have programming experience. Your track record will include working with protein data in particular knowledge of antibody and/or general protein engineering. Interested in working in immunoinformatics, you will be an excellent communicator with an appreciation of the different working environments on offer in industry and academia.

Queries about this post should be addressed to Professor Charlotte Deane (deane@stats.ox.ac.uk) or Dr Dan Nissley (daniel.nissley@stats.ox.ac.uk).

This post is fixed-term for three years, in the first instance.

Only applications received before 12.00 midday on 8 January 2021 will be considered.

Interviews will be held on 26 January 2021.

Contact Person : Shabana Akthar
Vacancy ID : 148667
Closing Date & Time : 08-Jan-2021 12:00
Contact Email : HR@stats.ox.ac.uk
