

The Yakhini Research Group ( <https://zohary.cswp.cs.technion.ac.il/> ) is seeking a motivated, experienced scientist to join our team and lead projects in the field of CRISPR genome editing. The team, consisting of computer scientists and bioinformaticians, is working in a collaborative setup on developing assays and analysis tools for assessing genome editing activity.

We are looking for independent and motivated individuals with:

An MSc or higher in computational biology or bioinformatics

Industrial project management experience is desired

Experience doing statistics and data analysis in Python

The working schedule is highly flexible. Compensation commensurate with industry.
