

Senior ML scientist @ Wild Biotech

Wild is growing to turn therapeutics discovery and development on its head. We look for exceptional people to help us do that.

Requirements

We are looking for a **senior** hands-on scientist that will lead a crazy ambitious project and grow with us.

- MSc/PhD related to machine learning application to biological/medical problems
- At least **5** years in the **industry** in R&D positions
- Proven experience in developing ML architectures for challenging prediction problems
- Hands-on Python-based machine learning frameworks and libraries (e.g. TensorFlow/PyTorch, Scikit-learn, Pandas etc.)
- Understanding of the nature of biological data and how to deal with it
- Healthy software development attitude

Responsibilities

As a senior machine learning scientist you will tackle our hardest predictive problems using challenging biological public and proprietary datasets. You will be responsible for the design and development of key ML models, as well as on data acquisition strategies to improve and validate the models.

If you are passionate about applying ML to truly important problems - talk to us.

Apply
