

POSTDOC POSITION in BIOINFORMATICS

We are looking for a talented postdoc researcher for an exciting project on plant-microbe interactions. The project combines fundamental and applied AgriTech research and is part of a joint study between Prof. Osnat Gillor of the Zuckerberg Institute for Water Research, the Ben-Gurion University Bioinformatics Core Facility and an innovative Biotech company. In addition, the postdoc will be involved in other projects that include analysis of high-throughput datasets.

Requirements:

- Ph.D. degree in bioinformatics, computational biology or microbiology with extensive experience with bioinformatic analyses.
- Strong knowledge of statistics.
- Experience with Linux environment.
- Programming in R and python – an advantage.
- Excellent ability to work in a team and outstanding interpersonal skills.
- Proven ability to communicate research results

Suitable candidates are encouraged to submit a CV to:

Dr. Vered Chalifa-Caspi, Bioinformatics Core Facility,

veredcc@bgu.ac.il

Prof. Osnat Gillor, Zuckerberg Institute for Water Research,

gilloro@bgu.ac.il
