

A postdoctoral position is available starting immediately at Clemson University, USA, the lab of Prof. Emil Alexov. The research fields, software and methods developed, and news about the lab are available at <http://compbio.clemson.edu>. The postdoctoral fellow is expected to participate in maintenance and further development of DelPhi package. The applicants must have fluency in C++ and Python, have experience in algorithmic development and background in Biophysics and Machine Learning. Important component of the work in the lab is development of algorithms and computer code for predicting the effects of amino acid mutations on the folding and binding free energy of macromolecules. Interested individuals should email Prof. Alexov at ealexov@clemson.edu.
