

## **Call for Research Assistant - Shamir's Lab**

We are seeking a part-time research assistant for an exciting clinical data analysis project using machine-learning. The project will analyze unique, very large-scale real-world clinical data. It will be conducted in Ron Shamir's lab (CS) in collaboration with Carmit Levi's (Medicine).

We are seeking a graduate student or a 3rd year undergraduate in CS, Bioinformatics, Statistics, or Engineering.

Responsibilities include processing the clinical data, statistical analysis, and machine-learning applications.

### Requirements

- Python (including packages such as pandas, numpy, pytorch etc.)
- Ability to work independently and proactively
- Experience with real-world programming tasks is an advantage
- Desirable: Background in Data Science and Machine-Learning

Interested candidates are welcome to submit their CVs to [teomim@mail.tau.ac.il](mailto:teomim@mail.tau.ac.il)
