

Postdoctoral fellow position opening

THE WINE GROUP
Systems Immunology and Immunotechnology Laboratory

Molecular Biology, Immunology, computational biology

Location: The Yariv Wine lab for systems Immunology and Immunotechnology
The Shmunis school of biomedicine and cancer research, the Faculty of Life Sciences, Tel Aviv University.

Position starting date: immediate

The Wine research group (www.yarivwine.com) studies the nature of the immune response following vaccine and/or disease. We are fascinated by the power of the adaptive immune response in various scenarios. Specifically, we are interested in the B cells and antibody response. We apply state-of-the-art omics tools combined with computational analysis to decipher the molecular characteristics of the B cells and antibody responses.

We are looking to hire a talented postdoc with experience with the following:

- Fascination and passion for science
- MD, PhD or MD/PhD training with track record of scientific accomplishments
- Excellent verbal communication and scientific writing skills
- Background in immunology and specifically, B cells and antibodies
- Experience with tissue culture, flow cytometry, standard molecular, cell biology and biochemistry techniques
- Experience with basic bioinformatics analysis and NGS data is a plus
- Exceptional planning, organizational, and multi-tasking skills
- Outstanding ability to work independently and in a team

Applicants should send C.V. to: theyarivwinelab@gmail.com
